[Reindeer Placemat to Make](#)

Items needed:

- Heavyweight printer paper
- Glitter glue (We used gold & white but silver would also look great)
- Scissors
- Laminating pouch

Instructions:

1. Print the image.
2. Trim edges, as needed.
3. Squeeze a blob of glitter glue onto work surface and then dab the glitter onto your image in a thin layer, using your finger. Kids, particularly, love this part! We put gold glitter on the bodies of the reindeer, but any color will look great.
4. Let dry thoroughly.
5. Insert glitterized image into the laminating pouch and follow directions on package to get a smooth surface.

* Optionally, you could leave the image without applying glitter and just laminate.
